

# Knowledge transfer at ARRB

# Knowledge transfer at ARRB

Training to further develop the skills and knowledge of transport professionals plays a key role in keeping up with the changing needs of the industry. As the premier supplier of high level workshops within Australia and New Zealand, ARRB provides opportunities to access the latest research, knowledge and experts. Delegates will hear about best practice and are provided with opportunities to network with industry colleagues.

Each year more than 1500 people from local government, state road authorities and consultancies receive knowledge updates from ARRB's in-house technical experts supplemented by specialist consultants and road authority staff.

All workshops are recognised for Continuing Professional Development (CPD) by Engineers Australia, and are wholly endorsed by the Australian Local Government Association (ALGA) and the Australian Institute of Traffic Planning & Management Inc. (AITPM). The Institute of Transportation Engineers ANZ Section (ITEANZ) also supports all workshops held by ARRB.

## **ARRB's extensive range of knowledge transfer events includes the following:**

- dissemination of latest standards, national guidelines and best practice
- presentation of key research project outputs to client employees
- search forums to explore and develop ideas for research priorities
- provision of study tours to Australia for overseas visitors
- training associated with the purchase of ARRB equipment
- the development and delivery of in-country training for major national road agency and Development Bank funded projects.

In addition to workshops ARRB also runs biennial conferences providing a forum to present and discuss latest research and best practice across the roads and road transport industries.

providing you with opportunities and the skills you need

**ARRB workshops cover a wide range of topics, some of the most popular workshops include:**

- Basic geometric road design
- HDM-4 seminars & training
- Local skid resistance strategies
- Managing road pavement assets
- Legal issues facing road authorities
- Bridge inspection level 1 training
- Unsealed local roads.

**Workshop topics based on Austroads Guides**

With the development and publication of new Austroads Guides, ARRB undertakes the development and preparation of a workshop to disseminate the new guide to those working in the industry in a timely manner.

- Investigation and treatment of crash locations
- Traffic control and communication devices
- Local area traffic management
- Planning and design of parking facilities
- Speed limits and speed management
- Traffic theory, studies and analysis
- Network management and traffic operations
- Traffic management: Activity centres and impact of developments
- Roadside safety design
- Road safety: Community and rural remote areas
- Geotechnical investigation and design
- Intersections, interchanges and crossings.

**Delegates' comments:**

*'They certainly are worthwhile and valuable'*

*'Keeps one up-to-date with current and new technology'*

*'Excellent source of professional development and learning with specific relevance to work practices'*

*'I enjoyed networking with like minded people in my specialist area'.*

**In-house knowledge transfer solutions**

In-house training solutions can be an excellent way to tailor training to the needs of an organisation in a cost-effective manner. In-house workshops can be arranged, either by modifying an existing workshop or by working with an organisation to develop a new workshop.

Please contact us on +61 3 9881 1555 or email [training@arrb.com.au](mailto:training@arrb.com.au) for more information on In-house workshops.

Please visit our website at [www.arrb.com.au/workshops](http://www.arrb.com.au/workshops) for the latest schedule of these and other events.

## About ARRB:

ARRB Group Ltd (ARRB) provides research, consulting and information services to the road and transport industry. ARRB applies research outcomes to develop equipment that collects road and traffic information and software that assists with decision making across road networks. ARRB is the leading provider of road research and best practice workshops in Australia.
