ARRB expands parking consulting services

To meet the growing demand for ARRB's specialist parking consulting services nationwide, ARRB has purchased the Melbourne-based Robert Luxmoore Parking Consultancy Services.

Gerard Waldron, Managing Director, ARRB Group, stated he was 'delighted to offer more parking related services to our clients'. Mr Waldron believes the inclusion of Luxmoore Parking Consulting under the ARRB Group umbrella 'complements the traffic engineering, transport economics, logistics and road safety businesses already established as a part of our 45 year history'.

'Property developers and car park owners will benefit from the joint capability as the ARRB team and the Luxmoore team join forces' said Larry Schneider, Senior Business Manager for Luxmoore Parking Consulting. 'Our expertise will ensure performance targets are achieved within budget and on time'.

In addition to advice on preparation of parking policy, managing parking operations, traffic engineering advice and safety assessments of car parks, Luxmoore Parking Consulting will offer independent income and expense audits, and performance monitoring.

The Luxmoore Parking central office will be located in Melbourne with members of the Luxmoore Parking Consulting team also located in the Perth and Sydney offices.

Ms Wendy Hamill, formerly of Robert Luxmoore, joins Luxmoore Parking Consulting as Principal Parking Consultant. Ms Hamill along with the other members of Luxmoore Parking Consulting have many years of experience in advising on the environment in which to establish parking facilities and the maximisation of customer service and net income from existing parking businesses.
